CHALLENGE

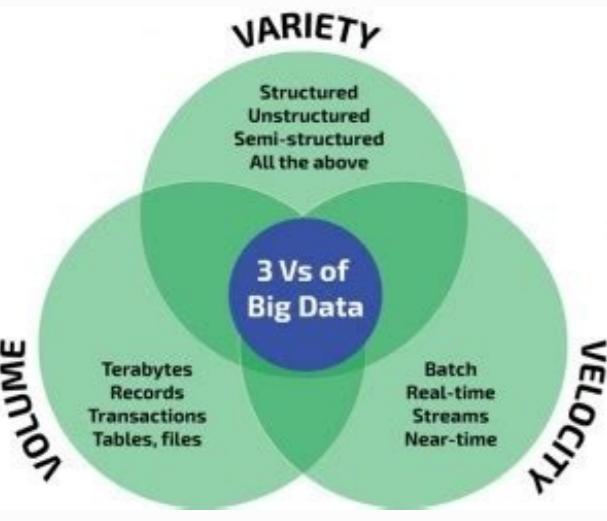

4.2.2: Basic function call.

Complete the function definition to output the hours given minutes

Sample output with input: 210.0

3.5

```
1 def output_minutes_as_hours(orig_minutes)
2
3     """ Your solution goes here """
4
5 minutes = float(input())
6 output_minutes_as_hours(minutes)
```

Codecombat level 7 answer

I need help with the combo challenge "forest storm" in cs3. plz help here is my current code: // Attack enemies or collect items less than 15 meters away. // Collect only "coin" type items. // Attack only "munchkin" type enemies. function collectAndAttack { var coin = hero.findNearestItem(); if(item){ if (item.type == "coin") { hero.moveXY(item.pos.x, item.pos.y); } } hero.moveXY(40, 34); var enemy = hero.findNearestEnemy(); if (enemy) { if (enemy.type == "munchkin") { hero.attack(enemy); } } while(true) { collectAndAttack; } Hi @Caleb_Stafford welcome to the CodeCombat discourse. I presume you're being killed by the lightning? I can't actually test it unfortunately because when I try to change the programming language it automatically reloads the level. But what I see from looking at your code is that you're going for items and enemies that are further than 15m from you, then moving back to the middle. Why don't you only go for items and enemies within 15m, then you won't get hit by lightning and you won't need to move back to 40, 34. Caleb_Stafford: // Attack enemies or collect items less than 15 meters away. // Collect only "coin" type items. // Attack only "munchkin" type enemies. function collectAndAttack { var coin = hero.findNearestItem(); if(item){ if (item.type == "coin") { hero.moveXY(item.pos.x, item.pos.y); } } hero.moveXY(40, 34); var enemy = hero.findNearestEnemy(); if (enemy) { if (enemy.type == "munchkin") { hero.attack(enemy); } } while(true) { collectAndAttack; } plz format ur code, ive done it for u dis time // Attack enemies or collect items less than 15 meters away. // Collect only "coin" type items. // Attack only "munchkin" type enemies. function collectAndAttack { var coin = hero.findNearestItem(); if(item){ if (item.type == "coin") { hero.moveXY(item.pos.x, item.pos.y); } } hero.moveXY(40, 34); var enemy = hero.findNearestEnemy(); if (enemy) { if (enemy.type == "munchkin") { hero.attack(enemy); } } while(true) { collectAndAttack; } #I do not do java, so tell me if put da brakets incorrectly In Computer Science 3(Python) Challenge-Friendly Minefield, the enemy at the bottom will not leave when I close to it. while True: enemy = hero.findNearestEnemy() if enemy.pos.y > hero.pos.y: hero.moveXY(hero.pos.x, hero.pos.y + 4) enemy = hero.findNearestEnemy() if enemy.pos.y < hero.pos.y: hero.moveXY(hero.pos.x, hero.pos.y - 4) else: hero.moveXY(hero.pos.x + 12, hero.pos.y) Hi @VegBird an welcome to the forum! Can you format your code as it is described below and can you also send us a link to the level? [Essentials] How To Post/Format Your Code Correctly Formatting your code before posting code is essential to our community, and if you don't we might not be able to help Everyone must know how to format ALL of your code properly. It's really easy and only requires a very small amount of effort. [Screen Shot 2020-04-04 at 11.55.07] To post your code from the game , use the button or it won't format properly. When you click the button, the following will appear: [Screen Shot 2020-04-04 at 11.55.36] Please paste ALL ... Andrei 1 Like Codecombat Cs2 Answers In our cs2 course, we require significant. An effect of students' learning. Because we will be going over the answers to the assignments in class, . Level 46 does not need an exact code. I'm having trouble with the Concept Challenge Forest Storm on Computer Science 3. I have the code that is supposed to be the correct code to beat the level from the teacher account. I have it copied word for word after not being able to figure it out, and my character stands doing nothing. Any help would be appreciated. I'm not a subscriber but I still might be able to help, what is your code and the objective. @Chaboi_3000 might be able to help Here is my code. Your function isCloseType() returns false no matter what are the targets and distances. First, I know what it says in blue, but what is the objective(What does the first hint say), that woud help a little more. Second, What is if(target.type == type) { } Third, The variable need to be on the outside of the while true loop Fourth, Other than that, I think it should work // Attack enemies or collect items less than 15 meters away. // Collect only "coin" type items. // Attack only "munchkin" type enemies. There are the hints. That was the code that devs suggested to my teacher as the correct code when he was helping me try to figure this out. My original code for that was "if(item.type == "coin"){ ", i had two separate functions for coins and munchkins.
